# Plastic Industry

- Plastics industry includes plastics raw materials producers, plastics converters, plastics recyclers and plastics machinery manufacturers
- China is the largest producer of plastic materials\*, followed by Europe and NAFTA. World production of plastic materials in 2016: 280 million tonnes.
- Global demand for polyethylene, the world's most used plastic, has nearly doubled since 1999
- There is phenomenal growth in demand for the key plastics that are critical to so many of the products and life essentials we rely on every day, such as cell phones, computers, food and beverage packaging, clothes, cars and even life-saving medical devices
- Producers and consumers have to work together to address the issues of sustainability and management of plastics recycling, reuse, or waste reduction

# Exports

- The growth in India's plastics export has been primarily boosted by higher shipment of plastic raw materials, plastic sheet, film, plates, and packaging materials
- India's plastics exports grew 31.6% to \$4.59 billion during April to September 2018 (H1 2018-19) as against \$3.48 billion in the same period last year. This is a faster pace of growth than the overall merchandise export growth from India, according to the Plastics Export Promotion Council (Plexconcil).
